- > 24 hour via EFPs
- > Cash Settled
- > Swap Points
- > Daily Cost to Carry Calculation
- > Retail Sized

NASDAQ OMX

We invented electronic trading 40 years ago and are the world's largest exchange company. Now NASDAQ OMX® brings product diversification and innovation to our futures exchange with the introduction of Spot Gold futures.

ACCESSIBILITY

Recent Dodd Frank legislation ceased trading of leveraged retail precious metals contracts as a means to protect individual traders from an opaque market structure. Spot Gold futures, developed by IKON Global Markets, provide retail customers access to a cash market surrogate for gold. These cash-settled futures contracts seek to simulate the spot market as closely as possible in an environment which offers the protection of a regulated exchange.

Exchange-listed Spot Gold futures further protect the customer with transparent central clearing, and are backed by the safety and security of The Options Clearing Corporation, eliminating counterparty risk. In addition, 24 hour trading is available via the Exchange of Futures for Physicals (EFPs).

UNIQUE

There is currently no other contract in existence that combines a cash-settled rolling spot contract with a swap point feature. Embedded in the product is the daily cost of carry (swap point). Each day this interest rate, if positive, is calculated with a resulting debit to the buyer and credit to the seller. Contracts can be cash-settled with as little as one 10 oz. contract, so they are sized appropriately for portfolios of all types. Spot Gold futures offer one maturity date per year, eliminating the need for inter-month rolls.

ABOUT NASDAQ OMX

The NASDAQ OMX Group, Inc. is the world's largest exchange company. It delivers trading, exchange technology and public company services across six continents, with more than 3,500 listed companies. NASDAQ OMX® offers multiple capital raising solutions to companies around the globe, including its U.S. listings market, NASDAQ OMX Nordic, NASDAQ OMX Baltic, NASDAQ OMX First North, and the U.S. 144A sector. The company offers trading across multiple asset classes including equities, derivatives, debt, commodities, structured products and exchange-traded funds. NASDAQ OMX technology supports the operations of over 70 exchanges, clearing organizations and central securities depositories in more than 50 countries. NASDAQ OMX Nordic and NASDAQ OMX Baltic are not legal entities but describe the common offering from NASDAQ OMX exchanges in Helsinki, Copenhagen, Stockholm, Iceland, Tallinn, Riga, and Vilnius.
